source idea showing once again that being associated to this idea is not a sign of failure and its backed up by being the most used web server in the world (from big and small business, to institutions and universities). With Apache HTTP Server, we will be able to run CGI, Perl ...

Apache HTTP Server 2.2.16 - Download

The original reason for creating Apache 2.0 was to solve scalability problems. The first proposed solution was to have a hybrid web server, one that has both processes and threads. This solution provides the reliability that comes with not having everything in one process,

combined with the scalability that threads provide.
