Hydrofluoric acid is so corrosive that it will dissolve glass. Although it is corrosive, hydrofluoric acid is considered to be a weak acid. One bucket full of water contains more atoms than there are buckets of water in the Atlantic ocean. Helium balloons float because helium is lighter than air.

Fun and Interesting Chemistry Facts and Trivia

Over the past two decades, organotrifluoroborates have evolved from being chemical curiosities to important reagents for the elaboration of organic molecules. Aside from their often-unique reactivity patterns, favorable features of these reagents include their ease of preparation/isolation, reliable crystallinity, enhanced stability, and monomeric structure.

CURIOSITY | meaning in the Cambridge English Dictionary

During this time, the middle and heavy REE generally were available in pure form only in sub-kilogram quantities and were chiefly chemical curiosities. In 1949, a carbonatite intrusion with extraordinary contents of light REE (8 to 12% rare earth oxides [REO]), was discovered at Mountain Pass, in the upper Mojave Desert, California (fig. 5).
