Hydrocarbons
Answer

ChemFacts. • The primary source of hydrocarbons is petroleum. • About 75 million barrels of petroleum are pumped out of the Earth each day. • Hydrocarbons are used as fuels and are the raw materials for products such as plastics, synthetic fibers, solvents, and industrial chemicals.

A more appropriate definition of organic chemistry is: The chemistry of hydrocarbons (compounds of carbon and hydrogen only) and the derivatives of hydrocarbons, (compounds containing C, H, and O, N, S, P, halogens etc). In some organic compounds, the metals such as Na, K, Ca and many others can be found.
