Background: The electrocardiogram (ECG) is one of the most useful diagnostic studies for identification of acute coronary syndrome (ACS) and acute myocardial infarction (AMI).

## **Five ECG Patterns You Must Know - Emergency Medicine Blog**

A 57-year-old male presents with AMS. He is minimally responsive and there is no additional history available. His initial heart rate was 25 with a blood pressure of 80/30. What is your interpretation of his ECG?

## **ECG Challenge: August-September 2020 EMRA**

However, the ECG is a cheap and reproducible test which is a standard investigation in the work up of many undifferentiated presentations in the Emergency Department (ED). Most advocate the liberal use of ECGs for Chest Pain patients but it is also useful in most medical and toxicological patients in the ED.

## **12 Lead ECG - EmergencyPedia**

Can't Miss ECG Findings for the Emergency Medicine Provider. Sudden cardiac death accounts for almost 400,000 deaths per year in the United States, and EM providers must be adept at discerning subtle, high-risk ECG findings. With the advent of triage ECG protocols, one of the most common interruptions in the ED is a request to "sign off" on an ECG. We present a reference of some of the most important high-risk ECG findings, intended to help ED providers systematically screen patients ...

Most patients have risk factors including CKD, CHF, DM, or medications like ACE inhibitors or potassium-sparing diuretics. Hyperkalemia has been called the great ECG mimicker. By poisoning the atria, hyperkalemia can produce bradycardia, and reduced P wave amplitude can mimic “regular” atrial fibrillation or junctional rhythm.

Life-Threatening Condition (II): Long QT Interval and T-Wave Alternans. The tracing shows a sinus rhythm at 60 beats/min. The QT interval (black double-headed arrow) is prolonged to 680 msec (normal, 300-440 msec), with a QTc also of 680 msec (normal, <460 msec). The T-wave heights alternate (blue arrows), and such alternation is often a precursor to the more severe rhythm of torsades de pointes.
