### Fms Manual

A Flight Management System (FMS) is a centralized computer system used in airliners, and other high-performance aircraft, to manage many of the aircraft systems, including (but not limited to) the flight plan. Contemporary airliners rely on the FMS to automate a wide-variety of tasks, previously performed by navigators and flight engineers.

### X-Plane 11

The FMS is comprised of seven movement tests that require a balance of mobility and stability. The patterns used provide observable performance of basic, mobility and stability movements by placing clients in positions where weaknesses, imbalances, asymmetries and limitations become noticeable by a trained health and fitness professional.

### Functional Movement Systems

The Functional Movement Screen (FMS) is a screening tool used to evaluate seven fundamental movement patterns in individuals with no current pain complaint or musculoskeletal injury. The FMS is not intended to diagnose orthopedic problems but rather to demonstrate opportunities for improved movement in individuals.
