Geography | National Geographic Society

Geography is an all-encompassing discipline that seeks an understanding of Earth and its human and natural complexities—not merely where objects are, but also how they have changed and come to be. Geography is often defined in terms of two branches: human geography and physical geography. Human geography is concerned with the study of people and their communities, cultures, economies, and interactions with the environment by studying their relations with and across space and place.

Geography - Wikipedia

China is the most populous country of the world followed by India, the USA, Indonesia, Brazil, Pakistan, Bangladesh, Nigeria, Russian Federation, and Japan. The ratio between the number of people to the size of land is known as the density of population. The density of Population is usually measured in persons per sq. km.
