Step 1, Set the brakes. Use your foot to push down on the lever near the rear wheels. While the lever is in its lowest position, it should prevent the wheels from moving.Step 2, Lock the front wheels. On some stroller models, the front wheels may also have a locking mechanism to prevent them from swiveling. First, push the stroller a few paces forward to put the wheels in the forward position. Then, look for a small lever between the front wheels. If present, it may need to be pushed up or ...
