Steviol is the basic building block of stevia's sweet glycosides. S. rebaudiana has been used over centuries by the Guaraní people of Brazil and Paraguay, who called it ka'a he'ẽ ("sweet herb"), to sweeten the local yerba mate tea, as medicine, and as a "sweet treat". In 1899, botanist Moisés Santiago Bertoni first described the plant as growing in eastern Paraguay, and observed its sweet taste.

### Stevia rebaudiana - Wikipedia

What is stevia? The Stevia rebaudiana Bertoni plant was discovered by the native Guarani people more than 1,500 years ago. The plant grew in clumps along the edges of the rainforests of Paraguay. In the beginning, the natives used the leaves for medicinal benefits, to freshen their breath, and to sweeten and mellow the strong taste of herbal yerba maté tea.
