A clear, concise writing style and more examples than any other text further contribute to students' ability to master the material.

### **Hibbeler, Hibbeler:Mechanics of Materials \_c7 | Pearson**

Mechanics of materials is a study of the relationship between the external loads applied to a body and the stress and strain caused by the internal loads within the body. External forces can be applied to a body as distributed or concentrated surface loadings, or as body forces that act throughout the volume of the body.
