Sociology, a social science that studies human societies, their interactions, and the processes that preserve and change them. It does this by examining the dynamics of constituent parts of societies such as institutions, communities, populations, and gender, racial, or age groups.Sociology also studies social status or stratification, social movements, and social change, as well as societal ...

sociology | Definition, History, Examples, & Facts ...

In mathematical sociology, the theory of comparative narratives was devised in order to describe and compare the structures (expressed as "and" in a directed graph where multiple causal links incident into a node are conjoined) of action-driven sequential events. Narratives so conceived comprise the following ingredients:
