Main points of Dalton's theory of atoms. All elements are composed of atoms. In a particular compound, atoms of different elements always combine the same way. Compounds contain atoms of more than one element.

### Section 4.1 Studying Atoms Flashcards | Quizlet

Studying the structure of atoms is a little like studying wind. Because you cannot see air, you must use indirect evidence to tell the direction of the wind. You might notice which way fallen leaves move as they are pushed by the wind, and infer that the leaves and wind are moving in the same direction.

### 4.1 Studying Atoms

All elements are composed of atoms. All atoms of the same element have the same mass, and atoms of different elements have different masses. Compounds contain atoms of more than one element.
