From engine sensors. Knock Sensor 850 has two knock sensors. Knock sensors are fitted to cylinder block to sense detonation inside cylinders. When detonation is detected, ECU retards ignition timing in each cylinder individually until knocking stops. EMISSION SYSTEMS FUEL EVAPORATIVE SYSTEM (EVAP) Evaporative emissions system is designed to prevent fuel

Volvo 850 Engine Theory And Operation - Volvo Owners Club

by oldgreenwagon • 18 Jan 2012, 23:45. So I have a 95 850 5 speed that just recently started knocking from the front end. You can hear it mainly while slowing down with the car in gear and while downshifting, and is less noticeable while accelerating. I can really only hear it when I'm driving slower than 20-25 mph and there is no noise at all while the car is idling, or when I slow down with it in neutral, but as soon as the clutch engages it starts right back up.

1995 850 GLT- Engine knock - Volvo Forums

I have a 94 volvo 850 turbo 2.3 liter k this is my dilemma my engine is knocking and my engine oil is full what else can it be can the engine coolant be empty cause my volvo reserve tank is always empty even after I put coolant in there a few mins later it is empty again but there is no leaks

Engine Knocking: I Have a 94 Volvo 850 Turbo 2.3 Liter K ...

Running any engine out of oil even for a very short bit will do damage. It it is a constant knock (RPM's match the knocking sound) it is most likely a connecting rod bearing.... probably the 5th cylinder. Rod bearing can still make noise. If the bearing is even gone a very little, that could allow the piston to be hitting the cylinder head...
