At first VW used a straight number for the engine number. By 1956 this number had reached just under 3.9 million with the 36hp 1200 engine, and in that year they introduced the first 40HP 1200 engine, so started a new number sequence starting with % million for the 40HP engine, leaving enough numbers for the 36 hp engine (still an option) to continue into the 4 millions.

The engine that was originally installed in your VW at the factory, had an engine number stamped into the case, just below the generator stand. This number consists of one or two letters followed by a series of numeric digits. The engine number does not equal the vehicle's VIN, but VW kept records of each new vehicle's original engine number code, and if you write to them you can get this information (for More Info.
